U.S. Patent & TMO/TM Mail Recd Dt. #01

The Office Action dated November 16, 2006 has been received and carefully considered. In response, applicant has amended the goods listed in this application to delete the class 9 goods. In addition, applicant has provided the requested information on the products covered by this trademark application. Applicant respectfully submits that the only two issues raised in the above-identified Office Action are addressed by this amendment. Accordingly, reconsideration and allowance is respectfully requested.

Please amend the above-identified trademark application by deleting the current recitation of goods and replacing it with the following:

CUTTING AND WELDING TIPS FOR GAS EQUIPMENT, in
International Class 7.

The above-identified Office Action rejected the list of goods for possibly including goods in more than one international classification. While applicant does not agree with the rejection, applicant has amended this application to delete the goods considered to

fall in International Class 9. Accordingly, reconsideration and allowance of this rejection is respectfully requested.

The above-identified Office Action also set forth a requirement that applicant provide information relating to the goods of this application. Attached is promotional material relating to the trademark of this application and the recited goods. As the Examiner will notice, these are gas operated welding and cutting tips as are recited in this application. Applicant respectfully submits that it has provided the requested information relating to the remaining goods in this application.

Applicant respectfully submits that the two issues raised in the above-identified Office Action are addressed by this amendment. Accordingly, reconsideration and allowance is respectfully requested.

Respectfully submitted,
